1. **Status:** Please all the replies and correspondence should be addressed to Examiner's new art unit 2629. Receipt is acknowledged of papers submitted on 02-08-2007 under election of specie A with discussion and without traverse, which have been placed of record in the file. Claims 54-65 are pending in this action. Claims 1-53 are cancelled.

2. Applicant's election with discussion and without traverse of specie A in the reply filed on 02-08-2007 is acknowledged. The requirement is deemed proper and is therefore made FINAL.

***Response to Amendment***

3. The new claims 54-65 elected specie A on 02-08-2007, does not introduce new matter into the disclosure. The added material, which is supported by the original disclosure.

4. Applicant has elected specie A with Claims 54-65 to overcome prior art teaching and cancelled Claims 1-53. Applicant has added new limitations to overcome prior art rejection. Applicant's arguments, see Remark, filed 02-08-07 and 08-09-2006, with respect to limitations of Claim 54 regarding "a first converted color element; wherein the first color element and the first converted color element belong to the same color component g1 look-up table; looking up a second color element of the input color in a second lookup table to generate a second converted color element; wherein the second color element and the second converted color element belong to the same color component b1 look-up table and converting a third color element to generate a third converted color element by gamma correction circuit; wherein the third color element and the third converted color element belong to the same color component r1 Gamma correction

circuit ; and wherein one of the color elements of output color is dependent to the first, second and third converted color elements R” have been fully considered, extensively searched in PGPUB, prior arts and are persuasive as they do overcome prior art rejection. The persuasive arguments filed on 08-09-2006 and 02-08-2007; newly added independent Claim 54 with allowable limitations are sufficient to overcome the prior art rejection; and put application number 10604599 in condition for allowance.

***Allowable Subject Matter***

5. Claims 54-65 are allowed.

6. The following is an examiner’s statement of reasons for allowance:

Applicant’s arguments filed on 08-09-2006 and 02-08-2007 are convincing. As argued by applicant in remarks under claim rejection on 08-09-2006, page 8, last paragraph and on 02-08-2007, page 5, last paragraph and page 6 paragraphs 1-3 and first two lines of fourth paragraph; the prior art of Lee (US 2003/0234795) in view of Champion et al (6,774,953) and Acharya (6,694,061) fails to recite or disclose the uniquely distinct features represented by underlined bold claim below;

**a first converted color element; wherein the first color element and the first converted color element belong to the same color component g 1 (green) look-up table; looking up a second color element of the input color in a second lookup table to generate a second converted color element; wherein the second color element and the second converted color element belong to the same color component b 1 (blue) look-up table and**

**converting a third color element to generate a third converted color element by gamma correction circuit; wherein the third color element and the third converted color element belong to the same color component r1 (red) Gamma correction circuit ; and wherein one of the color elements of output color is dependent to the first, second and third converted color elements R'.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.
